EDUCATION

B.Sc. in Software Engineering

Addis Ababa Science And Technology University

Relevant Coursework: Internet Programming, Database Systems, Object-Oriented Programming(Java), Operating Systems, Mobile Computing, Data Commiunication and Networking, C++, Artificial Intelligence and Machine learning

09/2023 – Present
Addis Ababa, Ethiopia

BA. in Management

Unity University

Relevant Coursework: Principles of Management, Organizational Behavior, Business Communication, Financial Accounting, Marketing Management, Human Resource Management, Business Law, Entrepreneurship, Project Management, Strategic Management

10/2024 – Present
Addis Ababa, Ethiopia

PROJECTS

End-to-End ASR

Currently working on speech-to-text model training using CTC and attention-based architectures, including fine-tuning Wav2Vec2-XLSR for automatic speech recognition (ASR). The project focuses on improving model performance for transcribing speech into text using deep learning techniques.

12/2025 – Present

Smart Home Automation System

A JavaFX-based simulation for home monitoring, safety, and appliance control. The system demonstrates automated device management and security features to enhance convenience and efficiency, particularly for individuals with physical limitations and homeowners seeking better home monitoring. Built using object-oriented principles and interactive UI design for simulated smart home functionality.

10/2025 – 12/2025

Gonikia-ChatAPP

Gonikia ChatApp is a locally developed real-time communication platform built using Socket.IO 🌀 and WebRTC, enabling instant messaging, high-quality voice/video calls, and fast file sharing. Designed for Ethiopian users, it delivers low latency performance even on limited networks, with a secure Node.js backend and scalable architecture. The project showcases strong skills in real-time systems, peer-to-peer communication, and modern full-stack development

08/2025 – 10/2025

SKILLS

Languages — Python, Typescript, Javascript, C++, Java, PHP, HTML/CSS, SQL

Frameworks — Hugging Face Transformers, React js, Node.js, Next js, PyTorch, torchaudio

Developer Tools — Github, VsCode, IntelliJ, Kaggle

PROFILE

Software Engineering student and AI enthusiast exploring machine learning and Large Language Models (LLMs) through hands-on projects. Studying at AASTU, with a strong passion for learning, problem-solving, and building technology solutions that drive innovation.
